### [Phoenix Center Gets Flamed](#) **Oct 7, 2010**

He called it a ;frothy mix of algebra and math jargon,; then quoted from the dense language to support the argument: ;a 2 1 speed of convergence parameter vector, C is a matrix that defines the contemporaneous structural relationship among employment and investment expenditures, and  $e_t = [e_{1,t} \ e_{2,t}]$ ; is a vector of mutually orthogonal structural shocks to these variables ... I am often similarly offput by pages worth of equations and algebraic explanations, but apparently they do often mean... (Multichannel News)

### [A look at Year Round Education Part 3](#) **Oct 7, 2010**

Several examples of this change are facts and memorization based on repetitive work and worksheets to the how to apply data, critical thinking and innovation. Another comparison can be seen in this change in focus whereby learning is broken down into analysis of isolated parts to learning in a holistic manner. (Somerset Daily American, PA)

### [Greenberg: The Demise of American Education](#) **Oct 6, 2010**

" The students are to decide what they want to learn. How would they know??? They haven't been exposed to anything! Ken Wrote: Oct 04, 2010 8:49 PM Right on, Mary! My wife is a college professor, and her students don't know the most basic facts of history and civics - things I learned in the fourth grade. I'd bet none of them even know how to diagram a sentence. They write worse than I did when I was in elementary school. Georgia Boy 61 Wrote: Oct 04, 2010 11:46 PM Mary, a very good set of...
